Who Am I

I am from Aleppo city in Syria. I studied Junior high at Muhammad Al-Shaer and Abdul Muttalib Al-Qad Schools. Then I moved to the Secondary Commerce Secondary School for Boys, then joined the Intermediate Banking Institute and graduated from it.

My professional life began by entering the Acad Institute and learning Java programming language, then I continued my path in all programming languages and became professional in them and obtained a programmer certificate from Sun Company in 2002, after that I began teaching these languages institutes like Syrian Informatic Center , Al-Mu'min Foundation and others.

I designed programs and websites for several companies, including Raneem Company, World of the Noble Qur'an and Syria Provider Company, where I designed many websites and programs that have benefited many of customers.

I have supervised of many graduation projects for university students in the field of designing programs and websites.

I also worked in the field of hardware in mobiles and smart phones because it is close of programming and has specialized in the maintenance of modern Samsung and Huawei devices.

I am currently working as a Full Stack Developer (Back-End and Front-End) programming for all devices in all programming languages, as learning new programming languages are not problem , the defrence btween them just the syntax of coding this language , I am working with MVC pattern can implement any project through any language, I am working as a free lance programmer for many companies.

Sun Certified Java Programmer since 2002

SOME OF THE EXPERIENCES THAT I HAVE

These are some of the projects I can do

WEBS APP

The project is made using bootstrap, html5, CSS3 and jQuery in terms of external design, and the site is programmed by PHP (LARAVEL FRAMEWORK) and MySql databases

DESKTOP APP

The project is made using C# on Visual Studio or Jetbrain Rider with Microsoft Access, SQL Server or MySQL databases

MOBILE APP

The project is made using JAVA or KOTLIN on Android Studio and SQLite databases

SOME OF THE PROJECTS I HAVE COMPLETED

This is some projects completed during 2019

Wasali website

It is a project based on delivering the required meals to customers via the Internet in exchange for an amount of money

School Management project

It is a project that runs a private preparatory school from the beginning of the year, from registering students to the end of the year and showing the results
